
Address Enhancement Solutions

By utilizing our address enhancement solutions, you won't waste another dime sending undeliverable mail. Our streamlined process will give you peace of mind when it comes to the efficiency and accuracy of your mail delivery.

FrontEnd Electronic Return Mail

Implement frontend CASS Error Code Filtering to suppress potentially undeliverable communications from mailing and receive an electronic return file via SFTP including all filtered records.

Reduces undeliverable mail and saves the cost of materials, First Class Postage, return mail, and time spent in the mail stream

Address Element Correction (AEC)

Ensure that your mail pieces contain address elements that are complete and correct.

Maximizes address quality while transforming problem addresses into accurate, standardized addresses

National Change of Address (NCOA)

Get the most accurate mailing addresses and move updates before mailing your communications.

Lowers postage, printing and mail preparation costs, while reducing delayed and undeliverable mail

Custom Filter

Suppress certain mail pieces utilizing our proprietary filter according to your business rules.

Manages custom business logic rules, while reducing return and undeliverable mail

Address Change Service (ACS)

This post-mailing service allows the USPS to forward your mail and return the change of address update/reason for non-delivery electronically.

Reduces the number of manual address correction notices received (replaced with electronic notifications)

Automated Return Mail Service (ARMS)

Allow CompuMail to process your return mail and provide you with an electronic return file including the reason for return and/or any updated forwarding addresses.

Eliminates investments in software or hiring employees to manually open returned mail and provides faster notification on return mail address updates via electronic file
